

Experiment Title 3.3

Student Name: SANSKAR AGRAWAL

UID: 20BCS5914

Branch: CSE

Section/Group: 20BCS-MM_806B

Semester: 5th

Subject Name: MMT Lab

1. Aim/Overview of the practical:

Create a suitable background with clouds and mountains on one layer. Draw the Sun on another layer. On the third layer draw birds. Provide animation to show the birds flying across the Sun that keeps fading using Macromedia flash.

2. Hardware Requirements :

- Minimum 384MB RAM,
- 100 GB hard Disk, □ processor with 2.1 MHz

3. Software Used : Photopea

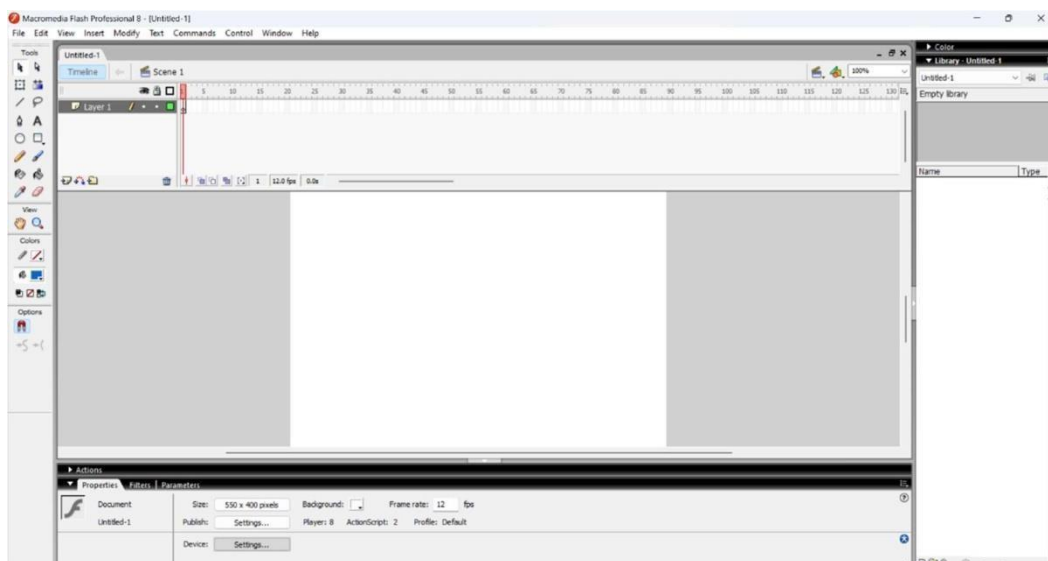

□ **Tools to be used:** Macromedia flash 8

4. Procedure :

Step 1: - 1. Open Macromedia Flash 8.

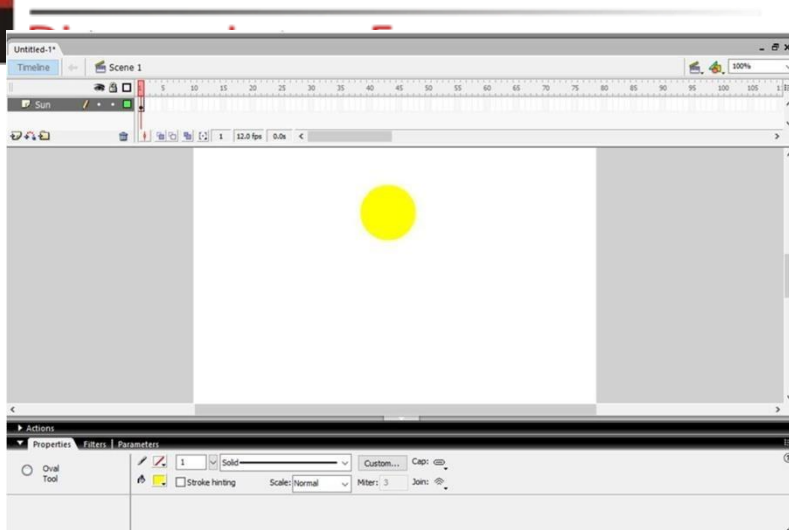

Step 2: - 2. Create a new Flash Document.

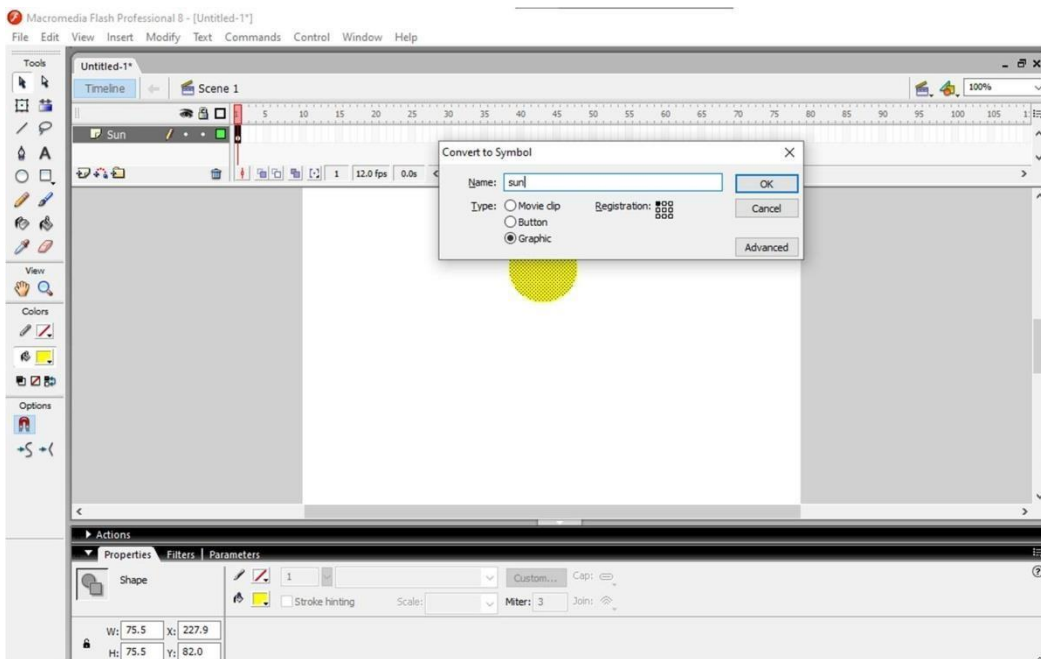

Step 3: Double-click on one layer and rename it as the sun

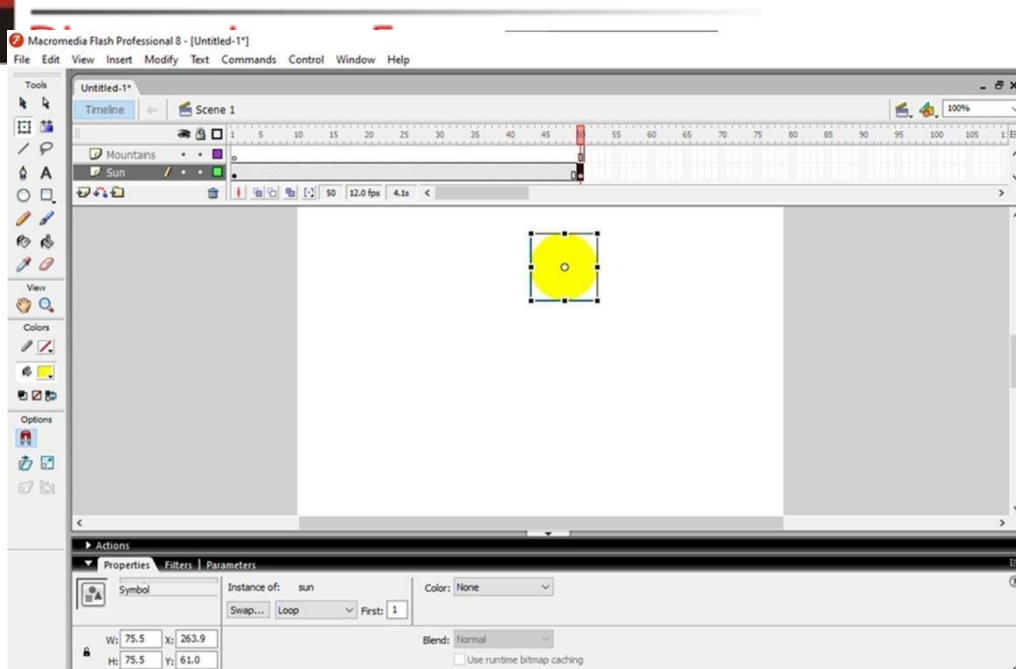

Step 4: Using the oval tool, draw the sun.

Step 5: Select the sun and convert it into a symbol (F8) and then go to the 50th frame and insert a keyframe (F6)

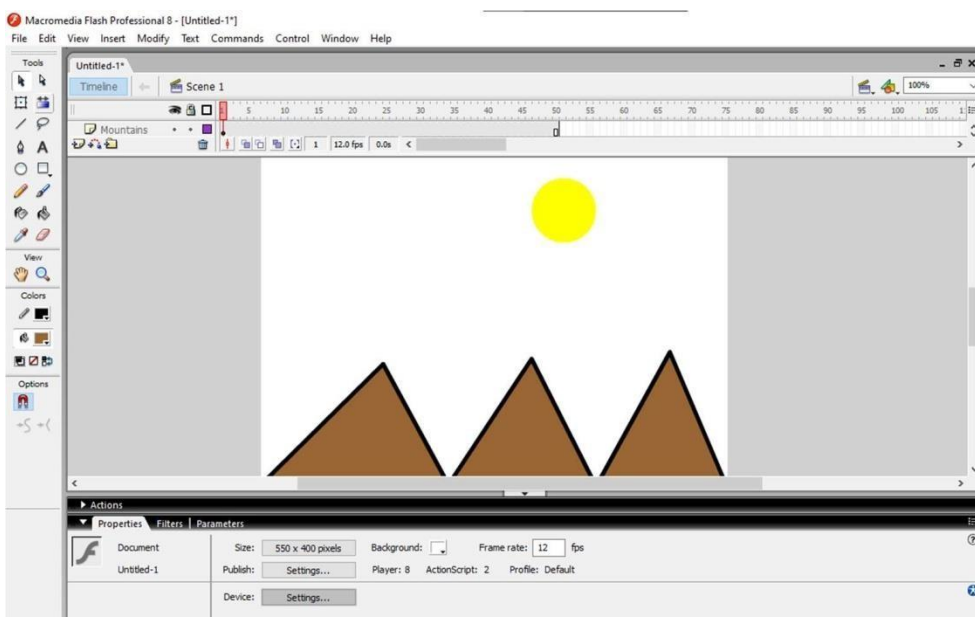

Step 6: By using free transform tool resize the sun and set the position.

Step 7. Insert a new layer and rename it as a mountain.

Step 8. Using a pencil or line tool, draw a mountain.

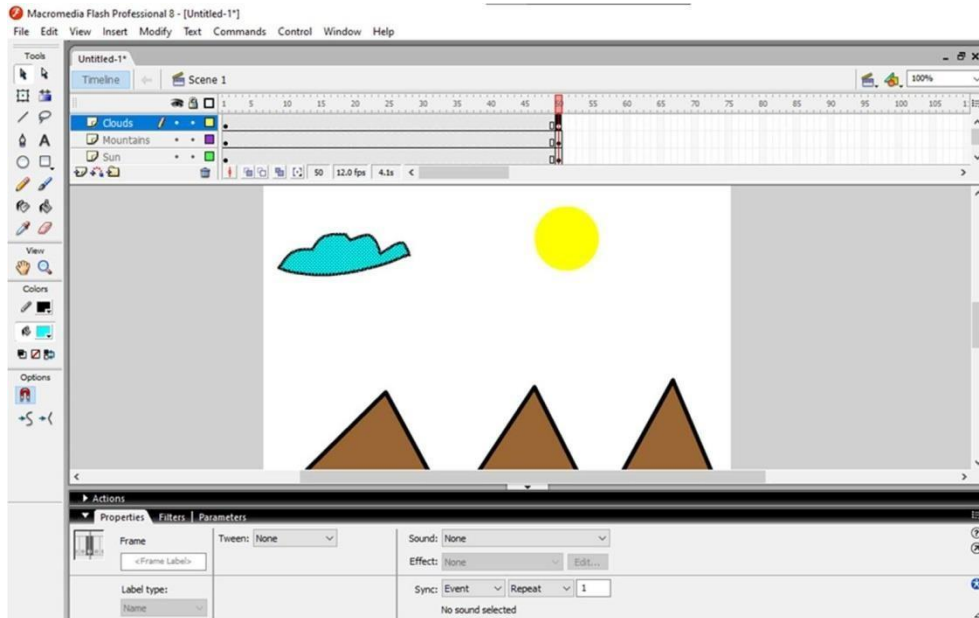

Step 9: Go to the 50th frame and insert a keyframe on the mountain layer.

Step 10: Insert a new layer and rename it as a cloud.

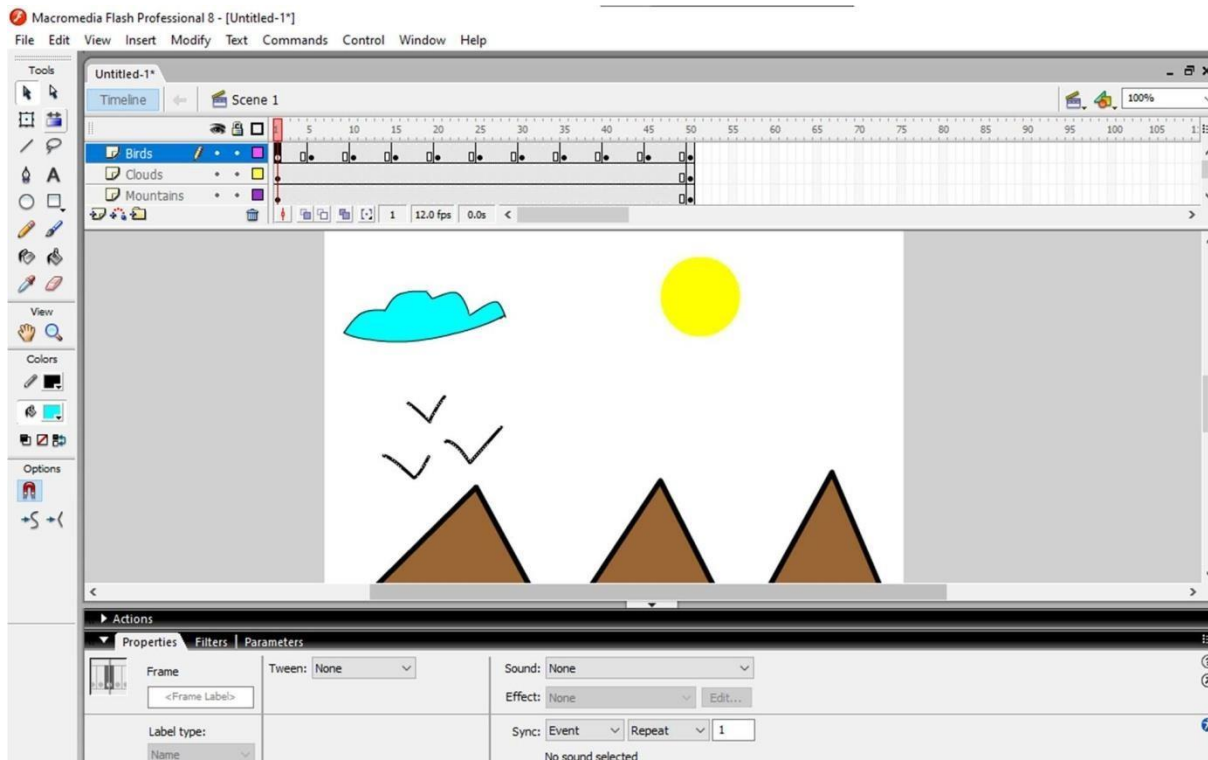

Step 11: Using a pencil or brush tool, draw a cloud.

Step 12: Go to the 50th frame and insert a keyframe on the cloud layer.

Step 13: Insert a new layer and rename it like birds.

Step 14: Draw the birds using pencil or brush tool, select all the birds by holding the shift key and insert a keyframe for birds' layer at intervals of 5.

Step 14: Press Ctrl + Enter to test the movie.
