

## Experiment Title 2.3

**Student Name: SANSKAR AGRAWAL**

**Branch: CSE**

**Semester: 5th**

**Subject Name: Multimedia Technologies Lab**

**UID: 20BCS5914**

**Section/Group: 20BCS\_MM\_806-B**

**Date of Performance: October 16,2022**

**Subject Code: 20CSP-339**

### **Aim of the Practical:**

Import two pictures, one of the sea and another of the clouds. Morph, merge and overlap the images using photpea.

### **Hardware Requirements:**

Minimum 384MB RAM, 100GB hard Disk, processor with 2.1MHz

### **Software Requirements:**

Photopea

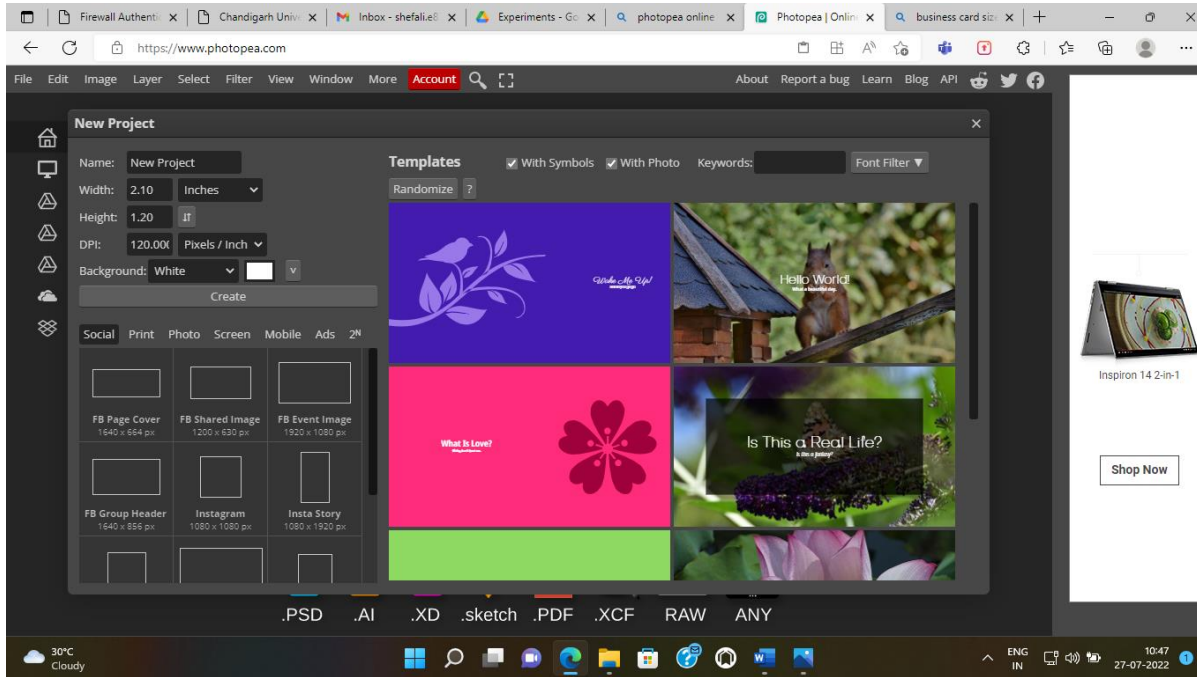

### **Tools Used:**

Raster Mask, Gradient Tool (G).

### **Steps for the experiment in photopea:**

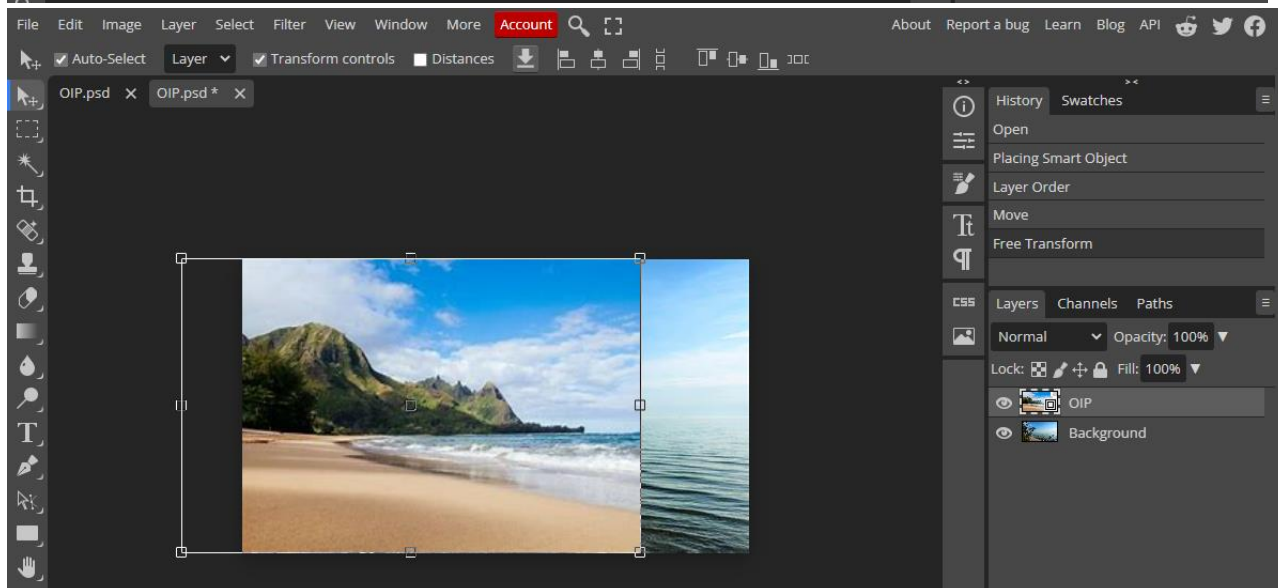

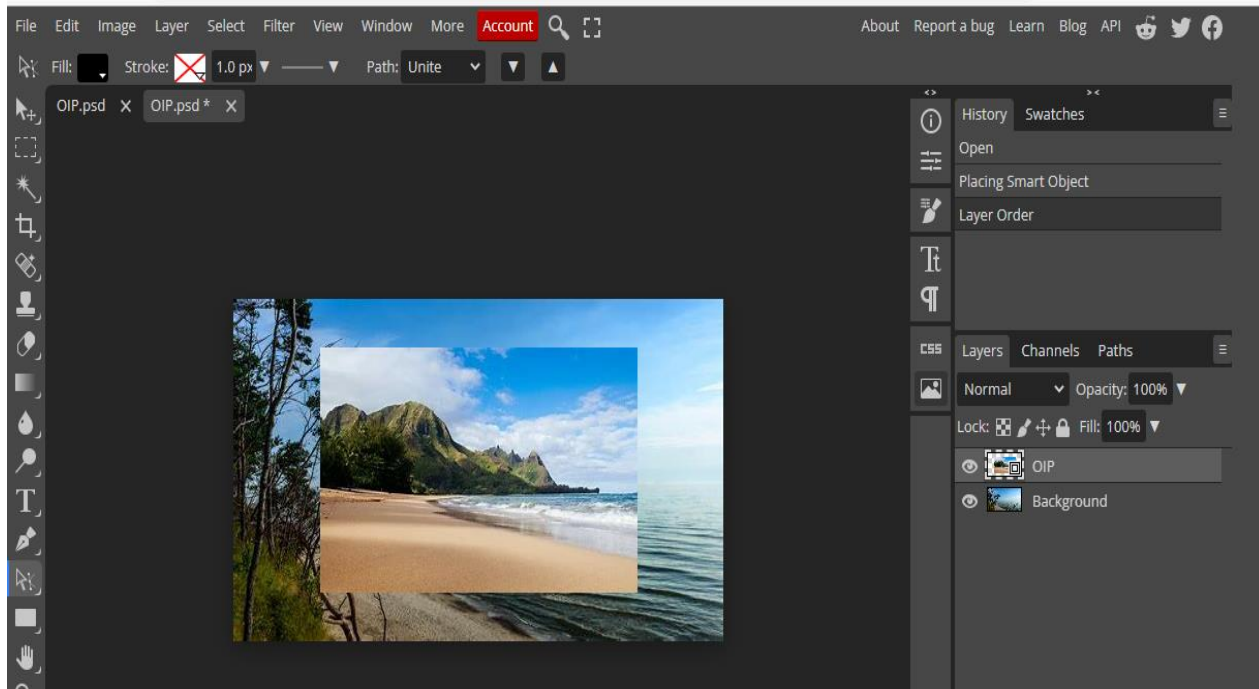

#### **2.1 Procedure to merge two photos together**

**Step 1 :-** Create the two new projects and set the dimensions according to the requirement.

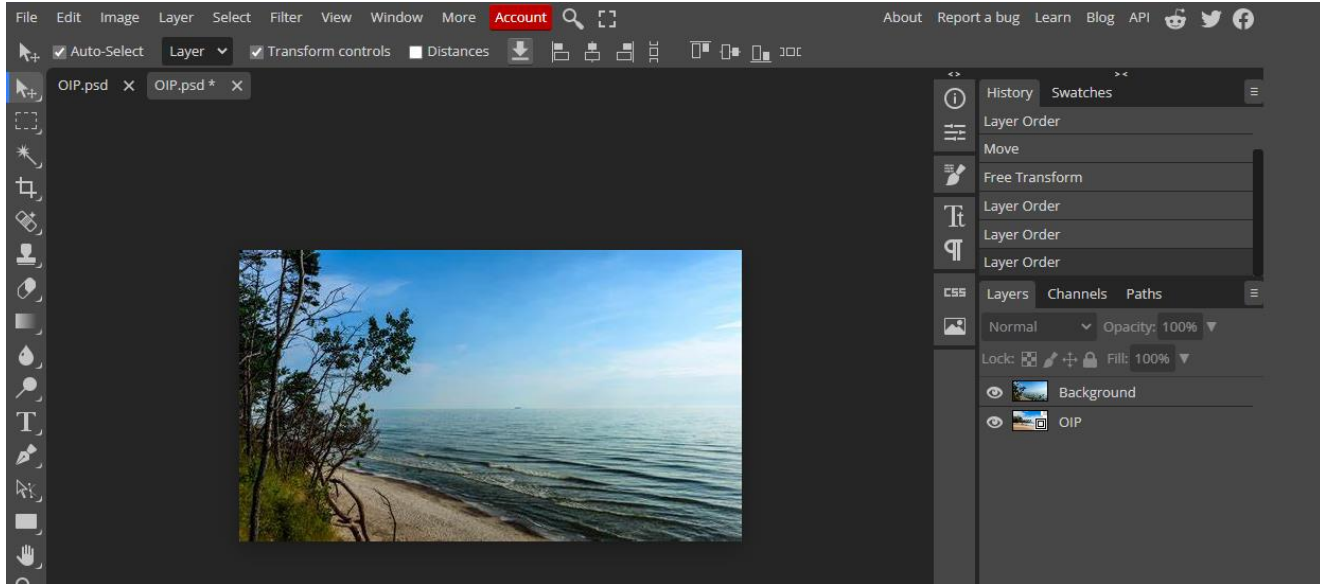

## Step 2:- Drag one background image to another image.

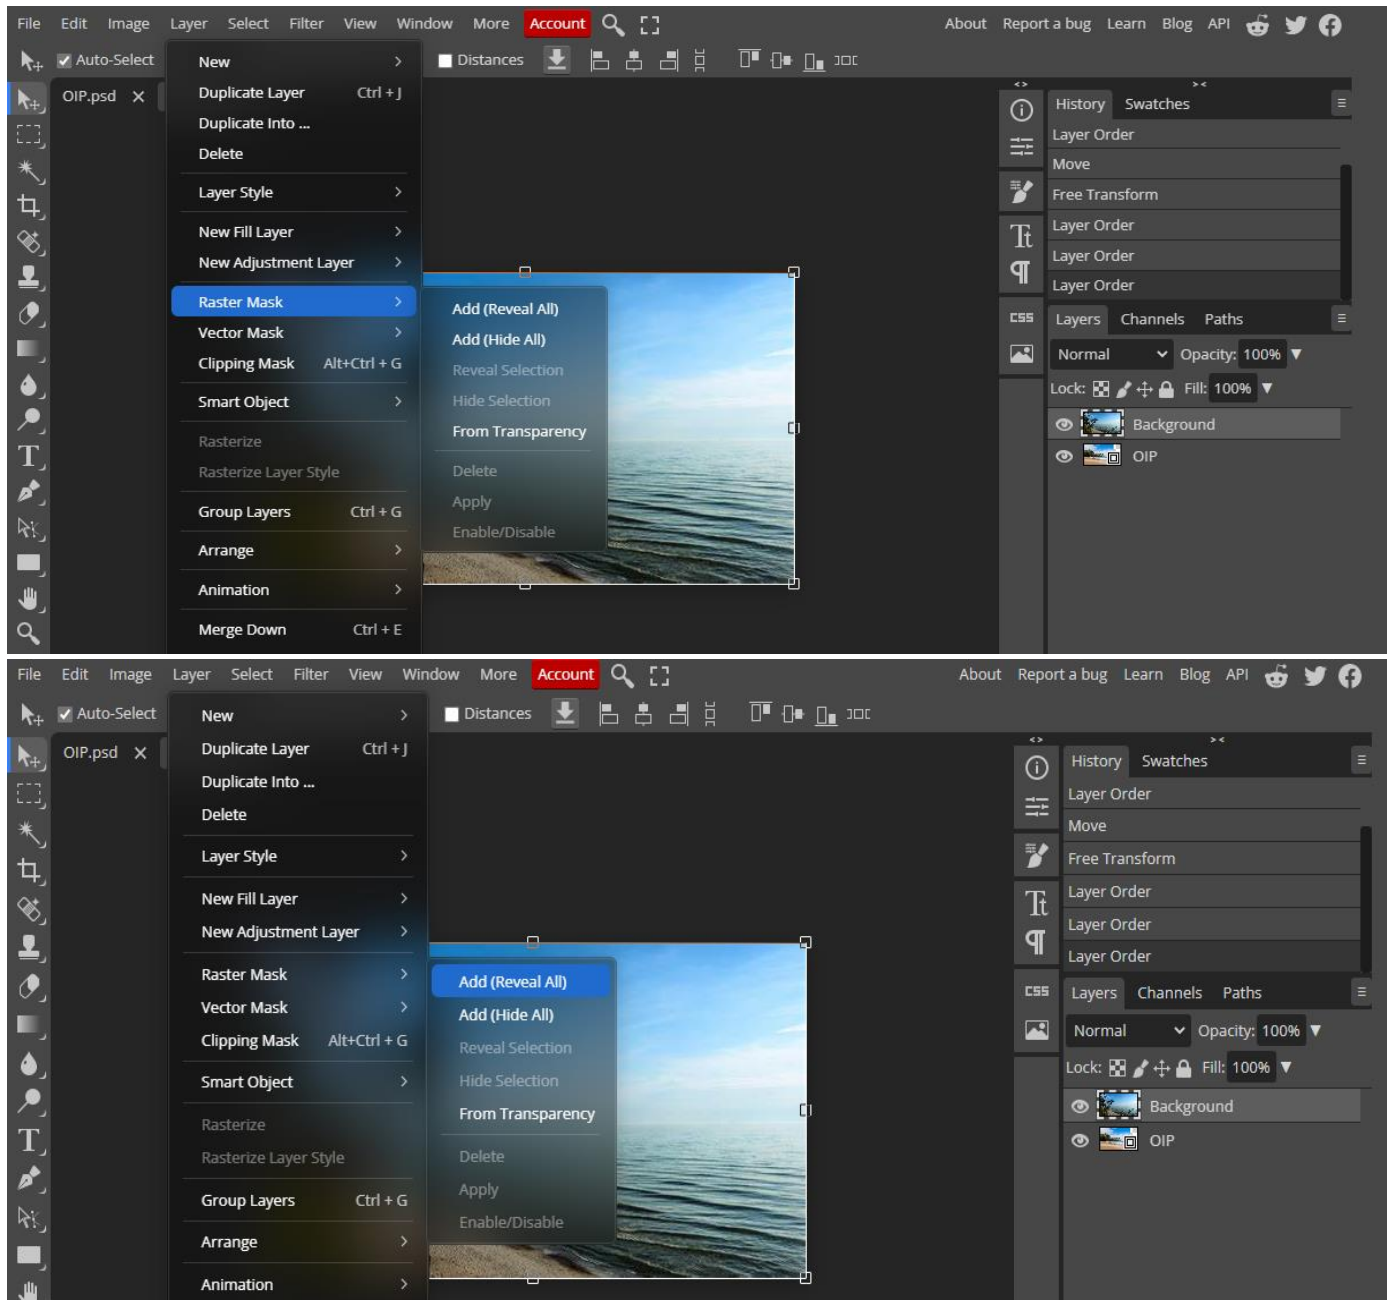

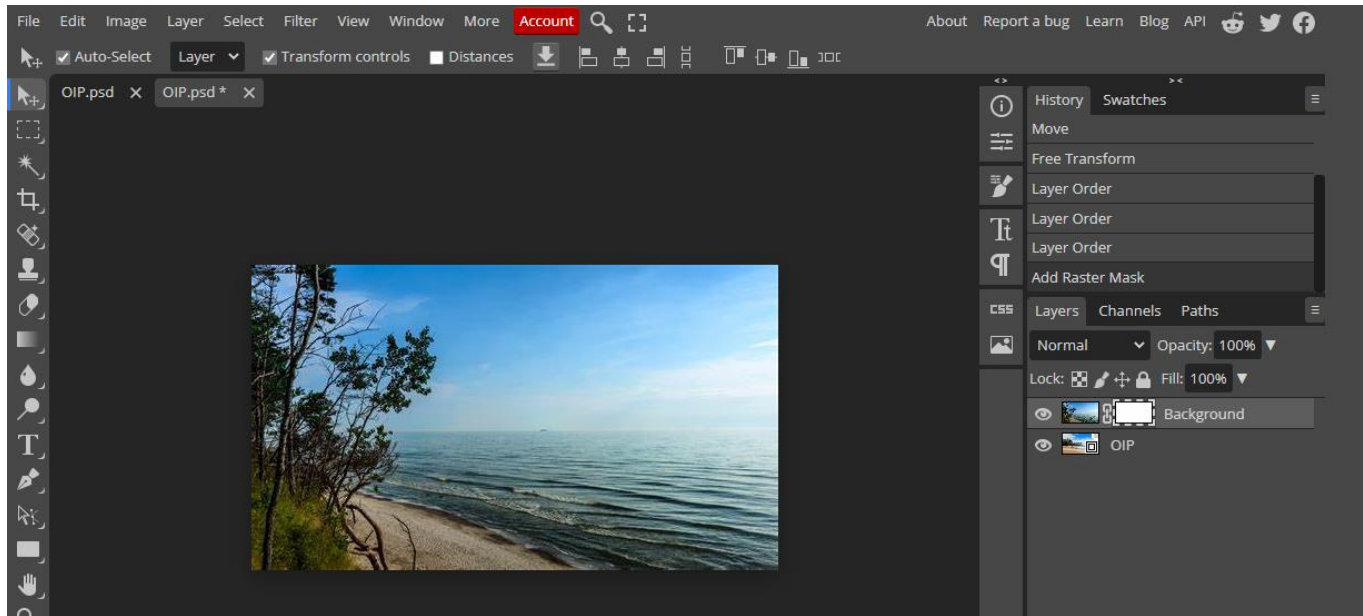

**Step 3:-** Drag the second background image over to the first image with the trees in the layers section.

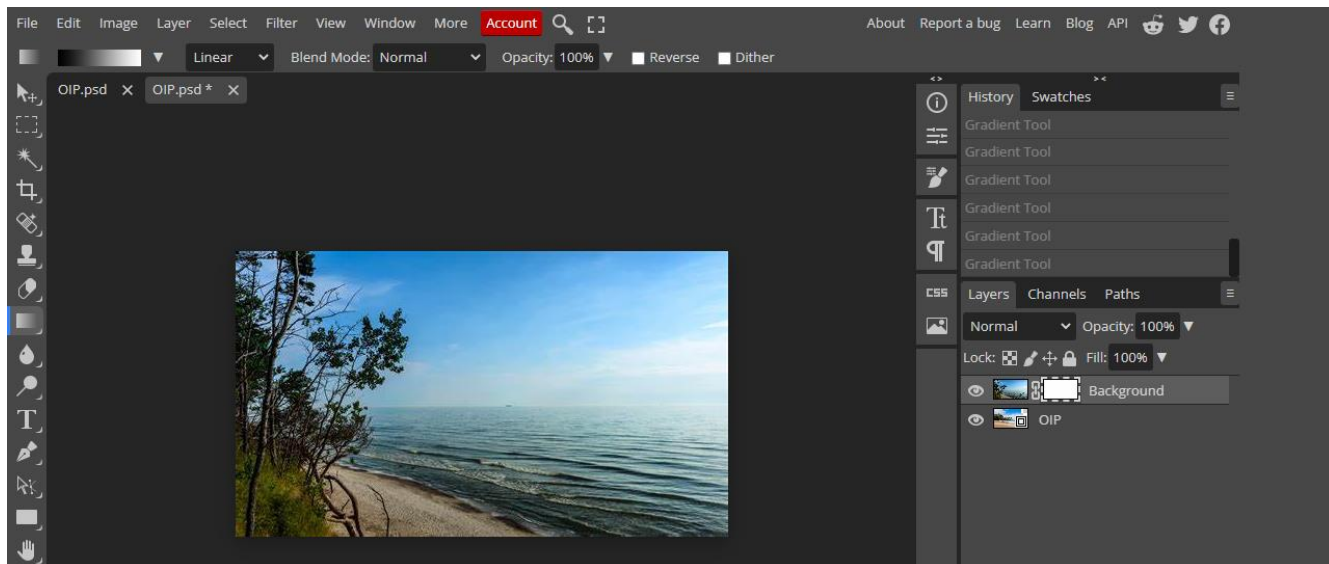

**Step 4:-** Go to Layers > Raster Mask > Add Reveal(ALL).

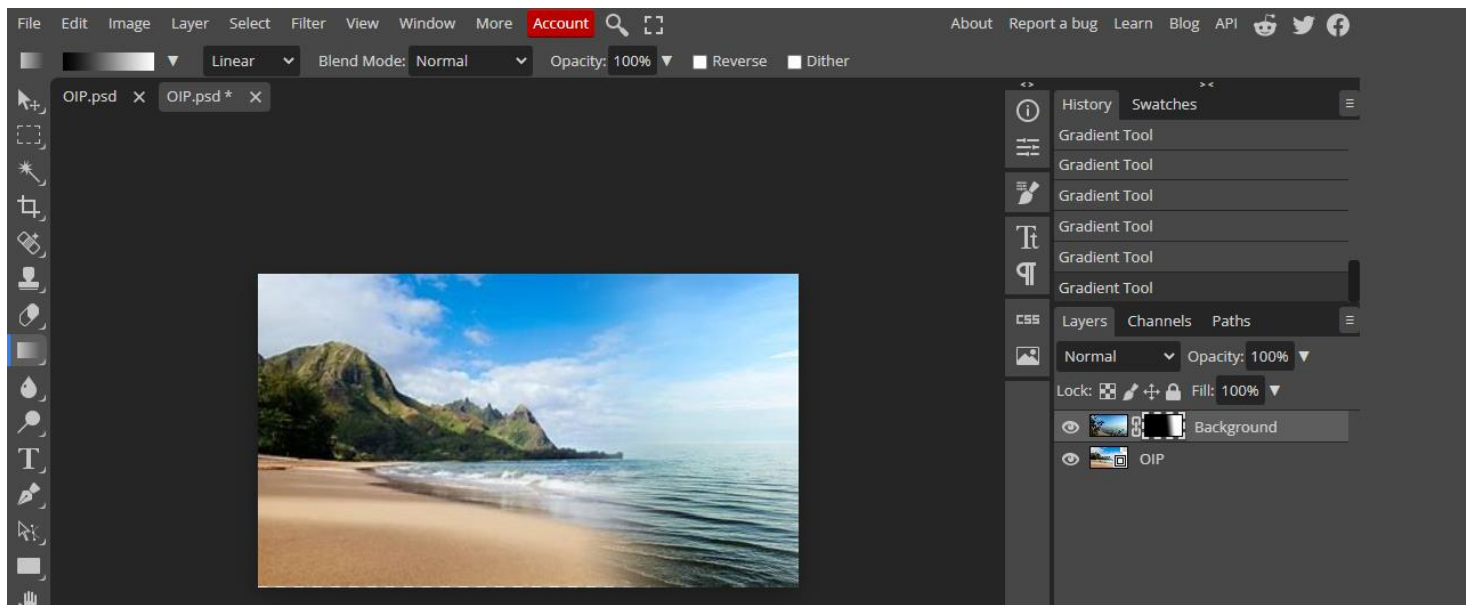

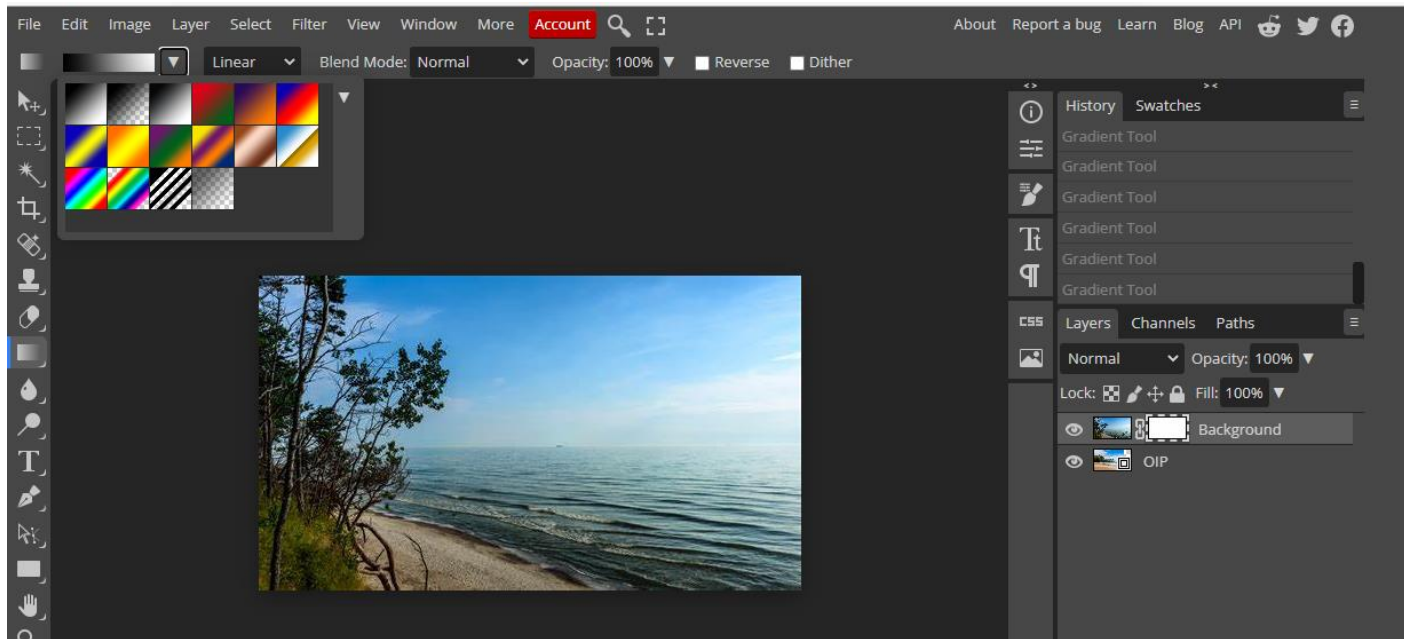

**STEP 5:-** Now select the Gradient Tool (G) from side bar.

**STEP 6:-** Now drag the line accordingly to merge the two photos as you seem good.

**RESULT:-**

### Learning Outcomes:

- Learned about merging a photo with other photo.
- how to use gradient tool and raster mask efficiently.

**Evaluation Grid (To be created as per the SOP and Assessment guidelines by the faculty):**

Sr. No.	Parameters	Marks Obtained	Maximum Marks
